DETAILED ACTION

Response to Amendment

A non-final rejection is issued due to the withdrawal of the allowable subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-36,40,43-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Gullen (U.S. Patent No. 3,890,970).

Gullen discloses a catheter comprising a catheter body 11 , connected to a hollow support member 16 and a collapsible lumen at the distal portion of the catheter. The apertures 25 are disposed on the collapsible lumen.

Claims 35-36,40,43-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Christopher (U.S. Patent No. 4,571,241).

Christopher discloses a catheter with a collapsible tube at the distal end with a plurality of apertures and a tapered diameter towards the distal end. The support tube 14 and a catheter body 17 are structurally connected as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 46-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gullen (U.S. Patent No. 3,890,970) or Christopher (U.S. Patent No. 4,571,241).

Gullen or Christopher discloses the invention as substantially claimed. See above. However, Gullen / Christopher does not disclose the openings to be slits or v-shaped slits. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the shapes of the openings as a mere design choice lacking any criticality or unexpected results. The openings would have performed in the same equivalent manner.

Allowable Subject Matter

Claims 37,39,41-42,48-52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
